Minor Programme Rules

A minor is intended for a student to gain expertise in an area outside his/her major B. Tech. discipline. A specialist basket of 3–6 courses is identified for each minor. Each basket may rest on one or more foundation courses. A basket may have sequences within it, i.e., advanced courses may rest on basic courses in the basket.

To successfully complete a minor, a student needs to take at least 9 credits from the courses defined in that minor basket. An aggregate CGPA of 7.0 is required across the compulsory and elective courses counted toward the minor. Courses counted toward a minor will be counted only as Free Elective (FE) credits. The area of the minor must be different from the major discipline of the student; courses that are part of the common core (including HSS), or the discipline core/electives cannot be counted towards a minor.

A student is allowed to take any number of minors, but a particular course cannot be counted for more than one minor. The name of the minor will appear on the transcript and degree certificate of the student.
