

CS 516P: CS 516P

Course Code	Exploratory Project
Course Name	CS 516P
L-T-P-C	0-0-6-3 (L-T-P-C)
Prerequisites	None
Intended for	M.Tech.Computer Science and Engineering (CSE)
Distribution	Core for M.Tech in CSE
Semester	Winter Session of Year I
Mutual Exclusion	None
Approval	50th BoA (Jul 2023)

Course Contents

It is advisable that the projects should be related to the courses M.Tech.(CSE) students may credit or the specializations that this program offers. Therefore, students can opt for any project in Theoretical Computer Science or Computer Systems or Artificial Intelligence/Machine Learning (AI/ML). Additionally, they are allowed to select a project from other areas, e.g., Human Computer Interaction, Signal Processing and Communications, or Applied Mathematics, as long as the project has 30% or more overlap with any of the three specializations of M.Tech. (CSE) curriculum.

Deliverables: A student must declare the deliverables of her/his project in the initial project proposal after consulting with the respective mentor(s). While the initial project proposal and the final report carry some marks, a significant portion of the marks, 70% or more, is allotted to the deliverables to emphasize their importance.

Contact hours: On average, a student should work 40 hours per week on her/his project. The students are supposed to meet their respective mentors at least once a week to report their progress.

Evaluation: There will be two evaluations, one in the beginning of the winter vacation and the other one in the beginning of the forthcoming semester. In the first evaluation, the students will be evaluated based on the initial project proposals they have submitted. During the second evaluation, they will be evaluated based on their progress with respect to the promised deliverables, their project reports, and the understanding they have gained from their respective projects.
