
EE 211P: Analog Circuit Design Lab

Course Code	EE 211P
Course Name	Analog Circuit Design Lab
L-T-P-C	0-0-2-1
Prerequisites	Network theory (EE 203), Applied Electronics (IC 161)
Intended for	BTech (EE)
Distribution	Core for B. Tech. (EE) and Elective for other UG Programmes
Semester	Even/Odd
Approval	recommended by the 32nd BoA (Dec 2019)

Experiment Modules

1. Lissajous pattern generation and its understanding.
2. Understanding of net-listing using SPICE simulations.
3. Understanding of I-V characteristics of BJT/MOS transistor.
4. Common emitter amplifier design.
5. Understanding of MOS class-AB pull-pull amplifier using CD4007 IC.
6. Active filter design using operational amplifier.
7. Operation of PLL understanding using 565 IC.
8. Operation of SAR understanding using 0808/0809 IC.
9. Project on analog circuit application.

Text Books

1. *Fundamentals of microelectronics* by Behzad Razavi, Wiley, Apr., 2013.
