
EE 500: Network Control System

Course Code	EE 500
Course Name	Network Control System
L-T-P-C	3-0-0-3
Prerequisites	For B.Tech. – Control System or equivalent course
Intended for	B.Tech. EE (3rd and 4th year), M.Tech., M.Tech. (R), PhD
Approval	54th BoA (May 2024)

Course Contents

- **Introduction:** Introduction to Network Control Systems, The Rendezvous Problem, Algebraic Graph Theory, Graph Connectivity and Robustness (Cheeger's inequality, proximity graphs). (10 Hours)
- **Consensus:** The Consensus Protocol, Discrete-Time Consensus, Directed Consensus, Switching Consensus, Lyapunov Stability with Switching Networks, The Synchronization Problem and Kuramoto Model. (10 Hours)
- **Multi-Agent Robotics:** Formation, Graph rigidity and Persistence, Formation Control and Design Choices, Leader-Follower Networks, Network controllability and network feedback, Distributed optimal control. (10 Hours)
- **Mobile Sensor & Communication Networks:** Sensor networks, Gabriel and Voronoi graph, Coverage Control, Communication models, random graphs, random consensus. (10 Hours)

Laboratory Modules

- None

Text Books

1. M. Mesbahi and M. Egerstedt, **Graph Theoretic Methods in Multiagent Networks**, Princeton University Press, 2010.
2. F. Bullo, J. Cortes, and S. Martinez, **Distributed Control of Robotic Networks**, Princeton University Press, 2009.
