Preamble

The objective of this course is to develop a comprehensive understanding of organizations and the principles that shape their structure and design. The course introduces foundational concepts in organization theory and examines how organizational purpose, strategy, and effectiveness inform structural choices. It conceptualizes organizations as open systems and analyzes the influence of external environmental forces on organizational design. Through the use of theoretical frameworks, case studies, and class discussions, students will develop analytical capabilities to evaluate organizational structures, examine coordination and control mechanisms, and assess organizational effectiveness across diverse and dynamic contexts.
