
ME 100: Reverse Engineering

Course Code	ME 100
Course Name	Reverse Engineering
L-T-P-C	0-0-2-1
Intended for	B.Tech B. Tech ME
Mutual Exclusion	None
Approval	53rd BoA (Dec 2023)

Course Contents

Laboratory Modules

Need of reverse engineering, Methodologies for Reverse Engineering, understanding of Reverse Engineering through example, reasons for reverse engineering, process for Reverse Engineering, Phases of Reverse Engineering, conceptual System Reasons for Reverse Engineering, Difficulties in Reverse Engineering, Levels of abstraction: Application level, Functional level, Structural level. Detailed study of Reverse Engineering for Branch Specific learning Disassemble the existing selected artefact/ product/ component/ process/ system to study technical aspects and design detail. Students will be assigned a their specialization specific product to do hands on of Reverse Engg and to draft a comprehensive report. An suggestive list of products that will be studied through reverse engineering will be compiled as reference for course instructor.

Course Outcomes

After completion of this course, student will be able to

- Understand the problem in the existing process.
- Collect the large number of data/ information for the product
- Depth analyze of the products and extraction of real time data
- Understand the principles behind the design of the product, ways to redesign and improve the performance of the system.

Text Books

1. Robert W. Messler Jr., **Reverse Engineering: Mechanisms, Structures, Systems & Materials**, McGraw Hill, 2014.
