
ME 600: Research Methodology

Course Code	ME 600
Course Name	Research Methodology
L-T-P-C	1-0-0-1
Prerequisites	None
Intended for	MTech(R), PhD
Mutual Exclusion	Research Methodology courses running in various schools
Approval	57th BoA (Oct 2024)

Course Contents

- **Overview of Research:** Purpose of research, selection of a research problem, literature review and research gap, various research methodologies, overview of logical reasonings, the scientific method, hypothesis forming (3 Hours)
- **Theoretical Research:** Importance of theory in research, introduction to physical and mathematical modeling, methods of theoretical research (1 Hour)
- **Experiments in Research:** Introduction to experimental research, design of experiments, measurement techniques and instrumentation, uncertainty analysis, best practices in experiments, and ethical considerations in experimental research (2 Hours)
- **Numerical Simulations in Research:** Importance of computational research, advances and applications of computational techniques in various fields, common numerical methods and tools (2 Hours)
- **Scientific Communication:** Elements of scientific communication, introduction to LaTeX, best practices in writing reports, theses and journal articles (6 Hours)

Laboratory Modules

A technical report writing with LaTeX will be part of the course in which the student needs to submit a report based on one's own research work.
