
IC 141P: Product Realization Technology Laboratory

Course Code: IC 141P

Course Name: Product Realization Technology Laboratory

Credits : 0 – 0 – 3 – 2

Prerequisite : Consent of the faculty member

Students intended for : B.Tech 1st year

Elective or Core : Core

Approval: Discontinued

Course Contents:

1. Facing and turing on mild steel rod on lathe machine (MS1)
2. To make a groove on lathe machine (MS2)
3. Taper turing operation on lathe machine
4. To perform boring operaton on lathe machine (MS4)
5. To perform knurling and threading operation on lathe machine (MS5)
6. Face and Peripheral milling operation on Milling machine (MS6)
7. Driling, reaming and tapping inn MS piece (FS1)
8. To make V-matching joint of mild steel (FS2)
9. To make V butt joint in horizontal position (WS1)
10. To make V butt joint in vertical position (WS2)
11. To perform gas welding operation (WS3)
12. Shearing, bending, and soldering of GI sheet (TS1)
13. To make a mould and core and assemble it (FDS1)
14. Product Realization : Mini Project 6
